PROFESSIONAL SUMMARY

Data Analyst with hands-on experience building dashboards in Power BI and Grafana, a solid foundation in SQL, data cleaning, and basic statistics and working knowledge of DevOps practices like CI/CD, Kubernetes and containerization. Skilled at turning raw data into clear, easy-to-understand insights for stakeholders.

SKILLS

Languages & Querying: Python, SQL (Window Functions, Subqueries, CTEs, Aggregations), DAX

Data Analysis & Processing: Pandas (Basic), NumPy (Basic), Excel (Power Query, Pivot Tables)

Data Visualization & BI: Power BI, Grafana, Tableau (learning)

Database & Big Data: MySQL, REST APIs (basic)

Cloud & DevOps: AWS (Basics), Docker, Kubernetes, Terraform, CI/CD, GitHub Actions, Linux

Tools: Git, GitHub, VS Code

Soft Skills: Analytical Thinking, Data Storytelling, Collaboration, Problem-Solving, Adaptability

INTERNSHIP

Data Analyst Intern | *Efftronics Systems Pvt. Ltd.* · Vijayawada, Andhra Pradesh

May 2026 – Jun 2026

- Gained hands-on experience with Power BI, building practice reports and writing DAX measures to develop foundational skills in data modeling and visualization.
- Contributed to the **Embassy Water Management project**, analyzing daily villa-level water consumption patterns sourced from borewells via a centralized storage distribution system.
- Implemented ETL pipeline workflows to extract, transform, and load water usage data, enabling accurate trend analysis and real-time consumption monitoring using Grafana dashboards.
- Collaborated with the analytics team to understand the full spectrum of projects the company has delivered — studying each project's architecture, data flow, and implementation approach from scratch to build a strong contextual foundation.
- Deepened SQL proficiency through active querying and data extraction tasks, contributing to team deliverables across ongoing projects.

Skills: Power BI · Grafana · Dashboard Development · Data Visualization · ETL pipeline · DAX

PROJECTS

Interactive Analytics Dashboard & Web Portal – Global Income Distribution |

May 2026

Tech: Power BI · DAX · Excel · React (Vite) · Node.js · Express · SQLite · JWT

- Collected and cleaned World Bank datasets (Gini Index, GDP per capita, median income); merged multiple sources into a single master dataset using Power Query.
- Built an interactive Power BI dashboard with custom DAX measures such as Inequality Severity Index, Income Concentration Ratio, and Inclusive Development Momentum Score for multi-country analysis.
- Developed a full-stack web application with React frontend and Node.js/Express backend, featuring user authentication (JWT), country comparison tools, and an embedded live dashboard.
- Implemented an Admin Portal for user management, session tracking, and query monitoring, making the system scalable for real-world use by researchers and policymakers.

SecureAuth – Multi-Phase Authentication Platform | *Python, Flask, Crypto*

Oct 2025

- Developed a secure multi-phase authentication platform using Flask, implementing TOTP-based login, bcrypt hashing, and AES-RSA hybrid encryption for password and file protection.
- Built encrypted Password & File Vaults with secure credential sharing and browser extension support, ensuring end-to-end data confidentiality and seamless user experience.

Automated Deployment for Portfolio Website | *Terraform, Ansible, GitHub Actions, AWS(Ec2)* Dec 2025

- Designed and deployed a cloud-based portfolio website using Infrastructure as Code with Terraform on AWS.
- Automated server configuration and application deployment using Ansible playbooks.
- Implemented CI/CD pipeline using GitHub Actions to automatically build and deploy updates on every code push.
- Reduced manual deployment through automated infrastructure provisioning and continuous delivery pipeline.
